In the early days of electrification, so many frequencies were used that no single value prevailed (London in 1918 had ten different frequencies). As the 20th century continued, more power was produced at 60 Hz (North America) or 50 Hz (Europe and most of Asia). Standardization allowed international trade in electrical equipment. Much later, the use of standard frequencies allowed interconnection of power grids.

Utility frequency - Wikipedia

The 50th parallel north is a circle of latitude that is 50 degrees north of the Earth's equatorial plane. It crosses Europe, Asia, the Pacific Ocean, North America, and the Atlantic Ocean.. At this latitude the sun is visible for 16 hours, 22 minutes during the summer solstice and 8 hours, 4 minutes during the winter solstice. The maximum altitude of the sun during the summer solstice is 63.44 ...

50th parallel north - Wikipedia

The 60th parallel north is a circle of latitude that is 60 degrees north of Earth's equator. It crosses Europe, Asia, the Pacific Ocean, North America, and the Atlantic Ocean. Although it lies approximately twice as far away from the Equator as from the North Pole, the 60th parallel is half as long as the Equator line. This is where the Earth bulges halfway as much as on the Equator.

60th parallel north - Wikipedia

North America and Japan use 110V/60Hz electricity where as rest of the world use 220V/50Hz. The reason was historical. Engineers in USA originally laid lines for 110 V where as in Europe they did with 220 V. After that, it would have been too expensive to change the system. Neither system is inferior nor superior...

Why Europe/Asia use 220V/50 Hz but USA uses 110V/60 Hz ...

As the 20th century continued, more power was produced at 60 Hz (North America) or 50 Hz (Europe and most of Asia). Standardization allowed international trade in electrical equipment. Much later, the use of standard frequencies allowed interconnection of power grids.

Frequency - what it is, and why it's important.

50 Hz and 60 Hz power sources are most often used in international power systems. Some countries (regions) commonly use 50Hz power grid while other countries use 60Hz power grid. Alternating current (AC) is changing the direction of the current periodically. Cycle is the time of a cyclical change of the current. Frequency is the times of the current changes per second, unit Hertz (Hz). AC current ...
