Your car's suspension and steering system allows your wheels to move independently of the car, while keeping it "suspended" and stable. Any play or uncontrolled motion in these systems results in handling deterioration and accelerated tire wear. Also, your vehicle's alignment affects the condition of the suspension and steering systems.

Suspension Repair | ETD Discount Tire Centers

Your suspension is designed to work with four correctly-inflated tires, ideally of the same age and tread life. If optimal tire pressure doesn't fix the problem, make your diagnostic appointment. Is it safe to drive a car with bad suspension? Driving with a bad suspension is likely more dangerous than driving with a suspension in good shape.
