Training means engaging in activity to improve performance and/or fitness; this is best accomplished by understanding general sports training principles: overload, reversibility, progression, individualization, periodization, and specificity. Overload. Description: The exposure of tissues to greater than accustomed-to training stress .

Sports Training Principles : Current Sports Medicine Reports
"The chapter on object-relational database should be a great selling point for the book. No one else has the coverage on object relational that this chapter has; for example, the other new texts emphasize the purely object model. I think that the approach here is much more practical." --Betty Salzberg, Northeastern University"The coverage of this book is wonderful, especially the cutting-edge ...
