Innovation governance can be thought of as a system of mechanisms to align goals, allocate resources and assign decision-making authority for innovation, across the company and with external parties. In this series of articles, professor Jean-Philippe Deschamps delves deeper into this topic; what is innovation governance, what different

Abstract. To create value in an open innovation context, firms need to increase the permeability of their organizational boundaries to enable knowledge exchange with a broad set of partners. Yet, in order to capture value, firms also need to consider how to govern their cooperative efforts and prevent unintended knowledge leakage.
