Jcb Road Maintenance And Construction

In 1945, Joseph Cyril Bamford (Mr. JCB) began using his engineering flair to invent new construction equipment. Right from the start, our machines were shining examples of innovative thinking. This commitment to innovation means we've always reinvested heavily in R&D, production processes and customer care.

Highway and flyover projects require huge excavators and small road construction jobs can be managed with mini excavators. Motor Graders are used in construction and maintenance of dirt and gravel roads. They are used to create an even flat surface to lay the asphalt on. They are also used for foundation pads to finish grades before construction.
