Maple syrup is made from the sugar maple tree, and these trees need to be taken care of. The small hole drilled into the tree usually heals within one or two years. If maple trees are taken care of properly, the same tree can be tapped year after year.

### **Maple Syrup — Department of Ecosystem Science and Management**

The leaves of deciduous trees change color through the seasons before they are shed in the fall. In spring, the first leaf buds appear. In summer the tree is thick with green leaves. A substance called chlorophyll colors the leaves green and helps the plant make food. During fall and winter, it is darker and the trees can't make as much food.
