Problem Statement In Software Engineering

A problem statement expresses the words that will be used to keep the effort focused and it should represent a solveable problem.

How to Write a Problem

Where To Download

Statement. A problem statement is a clear concise description of the issue(s) that need(s) to be addressed by a problem solving team. It is used to center and focus the team at the beginning, keep the team on track during the effort, and is used to validate that the effort delivered an outcome that solves the problem statement.
