Science For The People: Science Radio Show & Podcast

Science for the People is a left-wing socialist organization that emerged from the antiwar culture of the United States in the late 1960s. Since 2014 it has experienced a revival focusing primarily on the dual nature of science. The organization advocates for a scientific establishment that is not isolated from society, rather one that uses scientific discoveries to advocate for and advance social justice and critically approach science as a social endeavor.

Science for the People - Wikipedia

This week on Science for the People, we're diving into the world of DNA barcoding. We speak with Mehrdad Hajibabaei, Associate Professor in the Department of Integrative Biology and the Centre for Biodiversity Genomics at the University of Guelph, about the International Barcode of Life.

Episodes: Science for the People

With radical analysis and non-hierarchical governing structure, Science for the People tackled the militarization of scientific research, the corporate control of research agendas, the political implications of sociobiology and other scientific theories, the environmental consequences of energy policy, inequalities in health care, and many other issues.

About SftP - Science for the People

Mission. Boston Science for the People seeks to: raise awareness of the political nature of science and technology; expose and critique the ways science and technology are controlled by the wealthy and used for private gain and domination rather than to address human needs; bring scientific knowledge and solidarity to collaborations with progressive community organizations and like-minded groups;
