Ideally, for fitness or recreational skating in the outdoors, the average speed may range between 6-20 miles per hour. However, other factors in the route, such as uphill and downhill movement may further influence the pace of the rider. Some skaters may approach speed as high as 40 miles per hour while moving downhill.

3 Ways to Stop on Roller Skates - wikiHow

An inline speed skate has four main parts. They are; the boot, the wheel, the bearing, and the frame which connects them all. Quad speed skates have the same components as inline speed skates. That is, with the exception of the plate which is used to connect the boots, wheels, and bearings. Ice speed skates are made up of a boot and a blade.
